

REPLACEMENT ABSTRACT

This ABSTRACT is to replace the original abstract per enclosed "NOTICE TO FILE CORRECTED APPLICATION PAPERS." We have also taken the opportunity to make some minor changes in the language for clarification.

With the application of this replacement abstract, the examiner should delete from the original application the following: page two below the heading, "abstract" including paragraphs 0001 and 0002; and delete also page twelve under the heading "abstract of the disclosure, all of page thirteen including paragraphs 0038 and 0039.

0001

System and method for improving the way that visual information is learned by the viewer through the presentation of said information according to type of content and its location relative to the reader's field of vision.

0002

The present invention relates to a method and system for improving comprehension and memory of information that is presented visually derived from the principles of Neuro Linguistic Programming (NLP). In particular, the present invention refers to such information that has been distilled into "chunks" that are most relevant to the part of the brain that is stimulated by the eyes being forced in that particular direction (e.g. chunks of technical information are located at the top of the viewing area). Finally, this invention relates to techniques for ~~simulating~~ stimulating the reader's brain by way of moving the eyes.
